

Amazing reports made just for Medisoft

Focus Reports Professional 6

Focus Reports is an advanced reporting system built to give healthcare practices and medical billing services to-the-point business information from Medisoft software systems. Focus Reports Professional includes reports, charts and graphs that give unparalleled information to Medisoft users.

It's All Included in Focus Reports Professional

- 368 reports, charts and graphs
- Software to organize, print and output reports to many file formats
- *Instant Reports* pop-up report printing that reads Medisoft screens
- Look-alike versions of Medisoft reports that can be edited for your needs
- Editor software for adjusting standard reports and designing new ones
- Learn to edit and create reports with over 3 hours of training on CD
- Report Server software for scheduling and delivering reports
- Fingerprint login software that works with Medisoft and Focus Reports
- Access Focus Reports directly from the Medisoft menu
- Developed using the same technology as Medisoft
- Reports come directly from Medisoft data — No exporting data, no special database tool installation, just fast, native Medisoft database integration

Use Focus Reports Professional

Focus Reports Professional can handle almost any Medisoft reporting task. Its built-in reports offer more information available in more ways than any other advanced reporting product for Medisoft. Get all the great things Focus Reports Professional has to offer faster than with any other Medisoft reporting technology. When your reporting needs aren't addressed directly by one of Focus Reports' hundreds of included reports, you can enlist the help of one of many Focus Reports custom report experts to get exactly what you need.

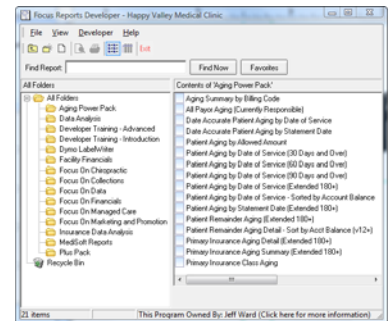

System Requirements

Focus Reports Professional version 6 works with all levels of Medisoft versions 10, 11, 12 and 14 on networks and stand-alone computers.
